Re: EB-10-GB-0075

Dear Mr. Fisher:

On March 17, 2010, the Federal Communications Commission notified Pemiscot-Dunklin Electric Cooperative that had received complaints from Mr. (name withheld) that equipment operated by your utility might be causing harmful radio interference to his amateur radio equipment. The complainant's contact information is as follows:

(Name withheld)
(Address withheld)
(Address withheld)
Tel: (number withheld)

The March 17, 2010 letter advised Pemiscot-Dunklin that the interference, if unresolved, could be a violation of Commission rules. For this reason, we encouraged Pemiscot-Dunklin to voluntarily resolve the matter without Commission intervention. The letter specifically stated, however, that if it became necessary for the Commission to facilitate a resolution, the Commission might investigate possible rule violations and address appropriate remedies, including monetary forfeitures.¹

On May 25, 2010, you reported to the Commission that you had conducted an inspection of the area and would continue to work with the licensee on locating and resolving the source(s) of interference. You further noted that you would report back to the Commission as soon as the repairs had been completed.

You failed to report back to the Commission as to the status of the repairs. In order to avoid enforcement action on this matter, you have thirty (30) days from the date of receipt of this

¹ Fines normally range from \$7,500 to \$10,000.

letter to respond to this office at the following address: 1270 Fairfield Road, Gettysburg, PA 17325. The response must contain a statement of the specific action(s) taken to identify and eliminate the source(s) of Mr. (name withheld) radio interference. Your response must also include a carbon copy to Mr. (name withheld) so that he can confirm any statement that you make regarding resolution of the interference. If you have any questions about this matter, please contact me at 717-338-2577.
